## Material Considerations for Packaging and the Relevant Converting Processes Used in Industry

Dr. Derek Saxon is a Product Development Engineer at Amcor in Neenah, Wisconsin. Amcor is a global leader in developing and producing responsible packaging for food, beverage, pharmaceutical, medical, home and personal-care, and other products.

In December 2023, Dr. Saxon delivered a presentation for the CSP's Beyond the Classroom series, delving into the intricate technical considerations of materials and converting processes within the packaging sector. Dr. Saxon is an alum of University of Minnesota's Department of Chemistry, a former member of the NSF Center for Sustainable Polymers, and a graduate student in the esteemed Reineke Lab.

*Please note that some content shared during Dr. Saxon's presentation remains proprietary. Attendees are encouraged to revisit the Beyond the Classroom page in the future for more information related to this presentation.*
